

A Qualitative Investigation into Creating a Typst Template for PhDs

Paige Turner

A dissertation submitted in partial fulfillment

of the requirements for the degree of

Doctor of Philosophy

of

University College London

Institute of PhD Writing

University College London

February 29th, 2048

I, Paige Turner, confirm that the work presented in this thesis is my own. Where information has been derived from other sources, I confirm that this has been indicated in the work.

Abstract

Originality

Part A: General Declaration

- ✓ This thesis is a presentation of original work.
- ✓ This work has not previously been presented for a degree or other qualification at this University or elsewhere.
- ✓ All input or assistance in the creation of the academic work other than from the supervisory team (including AI) has been acknowledged in Part B below.
- ✓ Any text or data in the thesis that has been presented for publication (including in review) elsewhere is declared in Part B below.

Part B: Declaration of contribution from other sources

Data sources, if not collected yourself: Include any paid/unpaid sources of data.

No data was used for this PhD template.

Software code, instrumentation development, etc.: Describe support received to write code (from human or AI), build bespoke equipment, and any other shared work.

Only Typst was used to create this PhD template.

AI: Include any use of AI, including generative AI, not already included in the above categories where it has been used as a functional tool to assist in the process of creating the academic work.

No AI was harmed in the making of this PhD template.

Other: Include any other material contributions to your thesis not already included in the above categories. Declare any contributions to proofreading other than standard editorial support, such as professional editing or substantial changes made by AI.

Credit to <https://typst.app/universe/package/casson-uom-thesis/> which I believe was the original inspiration for this UCL template!

Publications: Include full references for all published work and work that has been submitted for publication that includes material shared with the thesis on which the candidate is an author.

- For each published work give a full citation including: all authors; title; journal/book (chapter); page numbers; volume; date of publication; publisher; DOI – if available.
- If manuscripts have been uploaded to a preprint server, please give full citations including DOI.
- Under each listed publication, please identify to which chapter of the thesis the publication relates.
- For multi-authored works, state your contribution and explain where this work appears in the final thesis.

Nothing has been published

- **Thesis Chapter:** Chapter 3
 - **Published:** Not even remotely.
 - **Citation:** N/A
 - **Contribution:** Lead and only author.
- **Thesis Chapter:** Chapter 4
 - **Published:** Not even remotely.
 - **Citation:** N/A
 - **Contribution:** Lead and only author.

Chapter 1

Introduction

Chapter Outline

<u>1.1 Aims and Objectives</u>	<u>14</u>
<u>1.2 Thesis Summary</u>	<u>15</u>
<u>1.2.1 Non-Technical Summary</u>	<u>15</u>

Words: 67

Some introduction.

1.1 Aims and Objectives

Some aims and objectives, perhaps referencing the methods chapters.

- **How should I make the first methods chapter? (Chapter 3):**

I will attempt to create my first methods chapter.

- **Can I reproduce this as a second methods chapter? (Chapter 4):**

I will build on Chapter 3 by creating a second, identical methods chapter.

1.2 Thesis Summary

Summary of the thesis.

1.2.1 Non-Technical Summary

Non-technical summary of the thesis.

Chapter 2

Background and Related Work

Chapter Outline

<u>2.1 Sub-headings and References</u>	<u>16</u>
<u>2.2 Citations</u>	<u>16</u>
<u>2.3 Figures</u>	<u>17</u>
<u>2.4 Tables</u>	<u>17</u>
<u>2.5 Formulae</u>	<u>18</u>

Words: 183

This is the start of your background chapter (if you want one).

2.1 Sub-headings and References

This is the first sub-heading of the background chapter, which you can refer to as Section 2.1. If you want, you can also refer to the chapter as Chapter 2.

2.2 Citations

You can cite the references easily (Whiskers *et al.*, 2024). You can also manually cite in prose, as per Caffeine *et al.* (2025).

2.3 Figures

You can insert figures easily, as shown below in Figure 2.1.

Figure 2.1: This is a caption.

The source images can be anywhere, even in another folder. You might find it easier to store them in dedicated folders by chapter though.

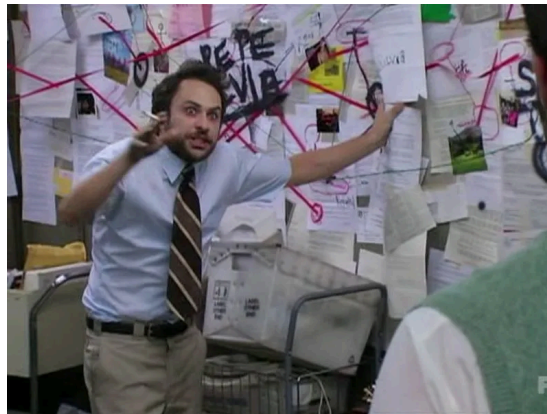

Figure 2.2: Trying to coordinate all your figures from one folder.

2.4 Tables

Tables are also easy to create, but long tables can get annoying to write around. You may prefer to store them as a dedicated variable under `tables/tables.typ`, and call the variable name here. This is shown below in Table 2.1.

Column 1	Column 2
1	First row
2	Second row

Table 2.1: This is also a caption

2.5 Formulae

You can do various mathematical formulae easily enough, both inline such as with $E = mc^2$ but also as a dedicated line:

$$\frac{\sin(x)}{n} = \text{six} \tag{2.1}$$
